Beurer HT 15 lice comb – simple combing rather than chemicals

Ulm, 29 August 2018 – Being prevented from going to school because of hair lice may be a dream for some school children, but a nightmare for many parents. The previous tiresome routine of checking the hair and removing lice – often using toxic chemicals – is now a thing of the past. The Beurer HT 15 lice comb is an approved medical device and rids the hair of lice through simple combing of lice and their nits.

HT 15 – removes head lice using an electrical impulse

After activation, the battery-operated lice comb then permanently emits an acoustic signal. When it comes into contact with a head louse or nit, the signal is changed. An electrical impulse is triggered which removes the parasites but is harmless to humans. The method is fast and effective, and does not use chemicals. The lice comb is approved as a medical device, and is supplied with a cleaning brush and a protective cap. The product can also be used for cats and dogs.

Beurer is presenting new products across all product areas at the IFA 2018. All of the highlights will be on show at Beurer's booth from **31 August to 5 September 2018** in **hall 4.1, booth 212**.

About Beurer

Beurer was founded in 1919 in Ulm and is synonymous with health and well-being. Today the long-standing company leads the way in several product fields in this segment; the company is the market leader in Europe in the area of flexible heating and the market leader in Germany for blood pressure monitors and massage products. Beurer is also one of the leading European suppliers of personal scales. This portfolio is constantly being developed further in all areas and offers products for use at home. It includes personal scales, kitchen scales, luggage scales, air cleaners, air dehumidifiers, air washers, thermo hygrometers, aroma diffusers, blood pressure monitors, blood glucose monitors, mobile ECG devices, hearing
