PRESSURE INFUSION SWITCH 2.0 HPC

THE BENCHMARK

PRESSURE INFUSION SWITCH 2.0 HPC green

500 ml	822.00000
1,000 ml	832.00000

Designed for daily use in theatre, intensive care and emergency vehicles, the reusable ERKA. Pressure Infusion Cuffs offer sophisticated details and efficient handling. The material used – a polyester fabric and nylon – is ideally suited for efficient pressure buildup followed by uniform emptying of the infusion bag. The infusion cuff has a quality manometer with an ergonomically shaped ball – for rapid pumping.

The constant influx of infusion solutions, even in emergency situations, is therefore guaranteed at all times.

Long-lasting: the mesh fabric of the cuff is durable and resilient. The transparent mesh material allows for a clear view of the bag and its contents.

Hygienic: the removable outer sleeve of the cuff is washable and easy to disinfect

Skin-friendly: all materials used are dermatologically safe and latex-free

The ERKA pressure infusion cuffs SWITCH 2.0 HPC are available in two sizes and suitable for all standard infusion bags with a volume of 500 ml or 1,000 ml. As part of the innovative ERKA. Switch 2.0 product family, the pressure infusion cuff Switch 2.0 HPC is specially adapted to the particular conditions of the MRI environment.

The ERKA. SWITCH 2.0 pressure infusion cuff is part of the innovative 2.0 SWITCH product family and is therefore generally MR-compatible.

The unit is also supplied with a quality manometer and hanging equipment.

REPLACEMENT PARTS

BALL	000.20900
