GEA®

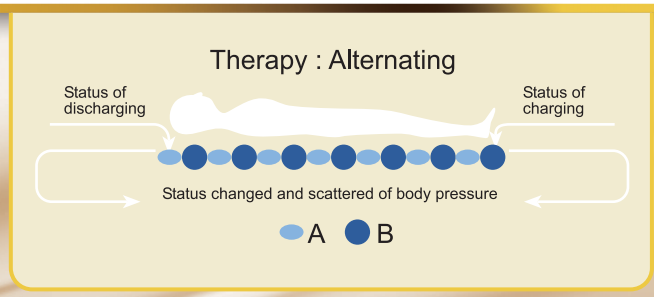

Our Anti-Decubitus Mattress are designed for comfort and support, and reduce the risk of pressure sores. This is because these mattress can distribute pressure evenly across their surface, reducing skin and tissue damage.

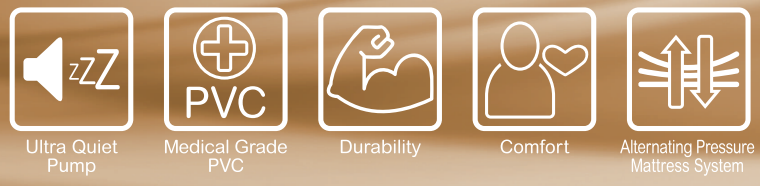

ADM-300B
ANTI DECUBITUS
Mattress System

ANTI DECUBITUS Mattress System consists of two parts: the mattress and the pump.

The pump utilizes a small compressor to remain quiet and energy efficient. The control panel is simple and very user friendly. The mattress relieves pressure by sequentially deflating and inflating alternate air cells on approximately 12 minutes timed intervals. It is widely recognized that constant pressure to a bony prominence is the leading cause of skin breakdown. The continuous movement supplied by the unit lessens the areas of constant pressure and enhances circulation.

Ultra Quiet Pump | Medical Grade PVC | Durability | Comfort | Alternating Pressure Mattress System

Interchangeable Cell Support System;

Provides Superior Treatment;

Durable and Medical Grade Nylon PVC;

Advance Comfort Therapy;

Maximum Patient Weight (kg)	:	140
Operating Power	:	~220V 50Hz, 0.1A MAX
Fuses	:	T1A 250V
OPERATING CONDITIONS		
Ambient Temperature	:	10°C to 40°C
Relative Humidity	:	10% to 75%
Mattress Dimension	:	2000 x 860 x 95 mm
Pump Dimension	:	270 x 130 x 105 mm
