For the Tech Savvy

Cutting edge technology helps the user to record and monitor the readings taken from the Omron HBF-222T. With the advanced Bluetooth Connectivity embedded in the Body Composition Monitor, the user will be able to send the collected data from the machine directly to the Omron Connect app, through the use of their smart devices. This will allow users to keep a close watch on their progress. The Omron Connect app gives the user a clear view of their overall health anytime, anywhere.

HBF-222T

For the Family's Health

The Omron HBF-222T has a memory capacity that can store the collected data of up to 4 users. Each Family will be able to have their health data saved for every time that they step on the Body Composition Monitor. The smart technology will also instantly recognise the user the second that they step on the machine. Their data will be retrieved to help them compare their progress from the last readings. Each member of the family will be able to monitor their way to better health.

For the Health Conscious

Perfect for those who need to monitor their overall body wellness to ensure that they are achieving their fitness goals. The Body Composition Monitor will keep a tab on the user's Body Mass Index (BMI), Skeletal Muscle and Body Fat Percentage, among other features, to help them keep within their ideal weight range for their age. The Omron HBF-222T makes keeping a tab on the journey to better health easier.
