STETHOSCOPES FOR PHYSICIANS
CHILD

ERKA. ERKAPHON DUO

SIMPLE. UNIVERSAL.

Children deserve the highest level of care. ERKA. paediatric stethoscopes are particularly high quality stethoscopes and were specifically designedfor smaller bodies. The small double-head chest-piece is optimally suited to the auscultation of children. The open bell side is specially designed for low frequencies and the membrane side for the entire frequency spectrum.

USER GROUPS :
Specialists in infant medicine, paediatricians

1. The pre-tensioned ERKA. convex membrane provides excellent resonance and sound transmission.
2. Highly polished and chromed for a non-porous surface, the brass chest-piece can be cleaned perfectly and quickly for maximum surface hygiene.
3. To ensure that the ears receive interference-free transmission of signals recorded at the chest-piece, the spring was not integrated into the tube channel.
4. The ergonomically shaped and individually adjustable headset guarantees an optimal fit.
5. The soft ear tips fit ideally into the ear canal and thus minimise the influx of external noise.
6. The standard 15° inclined binurals can be individually adapted to the ear canal characteristics of the user.

REPLACEMENT PARTS

EAR TIPS	EAR TIP SOFT
NON-CHILL RINGS	NON-CHILL RING CHILD
