ERKA. ERKAPHON DUO

SIMPLE. UNIVERSAL

The Erkaphon duo has a reversible double chest-piece. The open bell side is specially designed for low frequencies and the membrane side for the entire frequency spectrum. The universal application range as well as the durable, compact construction makes the Erkaphon a reliable companion in everyday medical practice.

USER GROUPS:
Paramedics, assistant physicians, anaesthetist nurses/caregivers, nurses/caregivers

1_ The pre-tensioned ERKA. convex membrane provides excellent resonance and sound transmission.

2_ Highly polished and chromed for a non-porous surface, the brass chest-piece can be cleaned perfectly and quickly for maximum surface hygiene.

3_ The ergonomically shaped and individually adjustable headset guarantees an optimal fit.

4_ The soft ear tips fit ideally into the ear canal and thus minimise the influx of external noise.

5_ The standard 15° inclined binurals can be individually adapted to the ear canal characteristics of the user.

The Erkaphon duo/alu was designed from an economic viewpoint. The use of efficient materials and the durable, compact design make this stethoscope a real economic alternative. Of course, the combination of high-quality components of the Erkaphon series in this stethoscope also provide the best possible acoustics.

USER GROUPS:
Paramedics, assistant physicians, anaesthetist nurses/caregivers, nurses/caregivers

1_ The reversible double chest-piece has an open bell side for the low frequencies and a membrane side for the entire frequency spectrum.

2_ The pre-tensioned ERKA. convex membrane provides superior resonance and sound transmission.

3_ The aluminium chest-piece is simple and can be cleaned quickly.

4_ To ensure that the ears receive interference-free transmission of signals recorded at the chest-piece, the spring was not integrated into the tube channel.

5_ The ergonomically shaped and individually adjustable headset guarantees an optimal fit.

6_ The soft ear tips fit ideally into the ear canal and thus minimise the influx of external noise.

7_ The standard 15° inclined binurals can be individually adapted to the ear canal characteristics of the user.
