STETHOSCOPES FOR PHYSICIANS
CHILD

ERKA. FINESSE

THE STANDARD FOR PROFESSIONALS

Perfect acoustics for tiny hearts!

ERKA. paediatric stethoscopes have a small membrane and a two-sided chest piece, so they are ideal for paediatricians. The open bell side is specially designed for low frequencies and the membrane side for the entire frequency spectrum.

USER GROUPS :
Specialists in infant medicine, paediatricians

1. The pre-tensioned ERKA. convex membrane provides excellent resonance and sound transmission.
2. The non-chill ring ensures the highest level of patient comfort.
3. Highly polished and chromium-plated for a non-porous surface, the brass chest-piece ensures perfect surface hygiene.
4. Two internal channels run parallel in the stethoscope tubing. This prevents the friction noises caused by two separate tubes.
5. Through the separately integrated spring in the tube, there is no acoustic loss from the chest-piece to the ear.
6. The ergonomically designed, super soft ear tips create an excellent acoustic seal against external noise interference and maximize wearer comfort and fit.
7. The standard 15° inclined binurals can be individually adapted to the ear canal characteristics of the user.

REPLACEMENT PARTS

EAR TIPS	EAR TIP SOFT	EAR TIP SUPERSOFT
NON-CHILL RINGS	NON-CHILL RING CHILD	BELL PROTECTION RING
